

## Pediatrics Meet 2020 Conference

### Brankica Vasiljevic

NMC Royal Hospital, UAE, E-mail: [brankica.vasiljevic2@gmail.com](mailto:brankica.vasiljevic2@gmail.com)

[Infant mortality rates](#) vary around the world. In 19th century, the infant mortality rate decreased by half as the number of physicians increased by four folds. Infant mortality will reduce by 30% with the addition of one physician to every 1000 persons in a population. Child mortality is not only caused by infection and disorder but also caused by premature birth, birth defect, new-born infection, birth complication, and disease like malaria, sepsis and diarrhea. The theme of this Pediatrics Conferences is kept as "Current Trends and Advancements in Neonatology & Pediatric Care". A scientific and advisory committee will ensure a highly interactive, scientifically simulative and intensive program for the conference. Pediatrics Conferences provide you a huge platform to gain and share your knowledge about the Pediatrics, Neonatology, Primary Care and Health Care.

[Clinical Pediatrics](#) is a restorative diary that takes to distribute and to access information on a change of type focus mind points alongside those of a logical, instructive, behavioral, clinical or ethical nature. Clinical Pediatrics in this Pediatric Conferences sensitivity is likewise a standout amongst the most vital and generally considered territories in novel research of this field.

[Pediatric allergy](#) is a crucial subject to be learnt to promote knowledge and enhance the treatment of respiration, allergic, and immunologic diseases in youngsters. according to the epidemiologic research the common chronic illnesses of children—asthma and allergies as well as many rare diseases and uncommon diseases.

[Neonatal Nursing](#) normally encompasses care for those toddlers who experience problems quickly after birth; yet it additionally consists care for toddlers who experience long-time period problems associated with their infection or prematurity after birth. Advancements in Neonatal surgery, anesthesia, and intensive care unit have enhanced the result for neonates with consolidated surgical conditions as well as for those preterm new-born kids with consolidated medicinal and surgical issues.

[Pediatric nutrition](#) is the maintenance of a proper well-balanced food plan consisting of the essential vitamins and the adequate caloric intake necessary to promote increase and maintain the physiologic requirements on

the various stages of a child's development.

Despite recent advances in neonatal intensive therapy, still is present significant morbidity associated with extreme prematurity that includes both short-term and long-term pulmonary, [neurologic and visual impairments](#). These complications of prematurity not only affect the quality of life of these children in the rest of their lives, but can also cause numerous medical and economic burdens in the society. No single therapy has proven to be effective in preventing or treating developmental lung, brain and retinal injuries in preterm infants or the hypoxic-ischemic brain injury in full-term infants. Dr. Brankica Vasiljevic explained [Stem cell based therapy](#) in neonates.

The elaborated information were discussed in 22nd Global Summit on Pediatrics, [Neonatology & Primary Care](#). With the response of our present conference, we are

announcing our next series “23rd World Congress on  
[Global Summit on Pediatrics](#), Neonatology & Primary Care”  
to be held during April 27-28, 2020 in Dubai, UAE.
